

Example Analysis

A worked example of an Enhanced Due Diligence review across two consecutive six-month periods, showing what the platform surfaces and how a portfolio moves between reviews.

PORTFOLIO	100 customer relationships
PERIODS	Jan–Jun 2025 and Jul–Dec 2025
PREPARED WITH	EDD Profiler

Portfolio at a glance

Every relationship is reviewed every period. The counts below are the second-half 2025 review.

How the portfolio moved

A review is not a ratchet. Between the two periods the platform escalated relationships whose activity diverged from their stated profile, and cleared those whose activity returned to it.

MOVEMENT	RELATIONSHIPS
Newly high risk Standard monitoring in H1, high risk in H2	3
Remained high risk High risk in both periods	5
No longer high risk High risk in H1, standard monitoring in H2	5

High-risk population moved from **10** relationships in the first half to **8** in the second — not because thresholds changed, but because customer behaviour did.

What the review surfaced

Findings across the whole portfolio in the second-half review, grouped by the pattern that triggered them.

FINDING	COUNT	
Elevated transaction velocity	33	
Volume deviation from expected	8	
Potential structuring	8	
High cash intensity	7	
CTR-threshold activity	3	
Undisclosed international activity	1	
Outsized single transaction	1	

Each finding is written into the customer's review package with the underlying transactions attached, so an analyst — and later an examiner — can trace the conclusion back to the activity that produced it.

Three relationships in detail

One escalated, one cleared, one sustained — the three ways a relationship moves between reviews.

Account 1001341 · Demand · Expected monthly volume \$2,000

REMAINED HIGH RISK

FIRST HALF 2025 — HIGH RISK

- CTR activity: 1 transaction(s) >= \$10,000
- Volume anomaly: actual avg \$31,000.00/mo is 15.5x expected \$2,000.00/mo
- Large single transaction: \$31,000.00 (15.5x monthly expected)

SECOND HALF 2025 — HIGH RISK

- Potential structuring: 21 transaction(s) in \$8,000-\$9,999 range
- High cash intensity: 69.9% of volume
- Volume anomaly: actual avg \$46,537.54/mo is 23.3x expected \$2,000.00/mo

TRANSACTIONS REVIEWED	TOTAL VOLUME	CASH SHARE
72	\$279,225	69.9%

NEWLY HIGH RISK

FIRST HALF 2025 — STANDARD MONITORING

- CTR activity: 1 transaction(s) >= \$10,000
- Volume anomaly: actual avg \$30,000.00/mo is 4.3x expected \$7,000.00/mo

SECOND HALF 2025 — HIGH RISK

- Volume anomaly: actual avg \$22,429.24/mo is 3.2x expected \$7,000.00/mo
- Undisclosed international activity: 15 transaction(s)
- High transaction velocity: 17/month

TRANSACTIONS REVIEWED	TOTAL VOLUME	CASH SHARE
101	\$134,575	0.0%

Bruce Wayne

NO LONGER HIGH RISK

Account 1001330 · Demand · Expected monthly volume \$5,000

FIRST HALF 2025 — HIGH RISK

- CTR activity: 1 transaction(s) >= \$10,000
- Volume anomaly: actual avg \$24,366.00/mo is 4.9x expected \$5,000.00/mo
- Large single transaction: \$49,473.85 (9.9x monthly expected)
- High transaction velocity: 16/month

SECOND HALF 2025 — STANDARD MONITORING

No investigation findings this period.

TRANSACTIONS REVIEWED	TOTAL VOLUME	CASH SHARE
59	\$21,784	0.0%

What a full review produces

- **A package per relationship** — checklist, full transaction ledger for the period, and external research, in the folder structure your procedure already specifies.
- **A consolidated portfolio report** — the statistics above, plus every flagged relationship written up in full.
- **An audit trail** — what was reviewed, what was found, and what the analyst concluded.

This example is deliberately partial. Risk scoring methodology, thresholds and weightings are not shown.
